Correct Answer: AD

---

### QUESTION 3

Which backup scenarios are allowed in multitenant database containers?

There are 2 correct answers to this question.

Response:

- A. A backup of a tenant database can be recovered to an SAP HANA single-container system.
- B. A tenant database can initiate its own backup unless this is prohibited by the system configuration.
- C. A tenant database can initiate its own backup and the backup of the other tenant databases.

D. The system database can initiate its own backup and the backup of tenant databases.

Correct Answer: BD

---

#### QUESTION 4

Which of the following events occur while the merge operation is running?

There are 2 correct answers to this question.

Response:

A. Uncommitted changes in the first delta storage are rolled back.

B. The content of the complete main storage is persisted to disk.

C. The content of the first main storage and the committed entries in the first delta storage are merged into the new second main storage.

D. All write operations go to the second delta storage.

Correct Answer: CD

---

#### QUESTION 5

You must design a high-availability SAP HANA database system with 8 hosts (6 worker and 2 standby) that also uses multitenant database containers.

Which rules apply?

There are 2 correct answers to this question.

Response:

A. The system database must run on the standby host.

B. The system database instance must run on all hosts (worker and standby).

C. The tenant databases must be able to be scaled out to all hosts (worker and standby).

D. The tenant databases must run on the worker hosts.

Correct Answer: BD
