QUESTION 1

Identify the activity that is not performed by Installation Check. Choose the correct answer(s).

- A. Completeness of installation
- B. Version compatibility
- C. Accessibility of the message server
- D. Network security

Correct Answer: D

QUESTION 2

Which of the following statements regarding the functions offered by CCMS-based monitoring are true? There are 2 correct answers to this question.

- A. It is possible to monitor more than one SAP system by using the functions offered by CCMS monitoring.
- B. Correctly configured threshold values to be used for monitoring purposes can be switched by using operation modes.
- C. You need a special key (generated within SAP Solution Manager) to create your own monitor definitions in transaction RZ20.

Correct Answer: AB

QUESTION 3

An SAP system\\'s Oracle database has four online redo logs, also known as database transaction logs. Each online redo log has a mirrored copy. What is the effect of a log file switch?

- A. The database switches between writing to the original redo log files and the mirrored redo log files.
- B. The database alternates between writing to the online and offline redo log files.
- C. The current online redo log is closed and the next online redo log becomes open for writing. The ARCH process is triggered to begin backing up the recently closed redo log.
- D. The current online redo log is copied to its mirrored copy, then the next online redo log becomes open for writing.

Correct Answer: C

QUESTION 4

Which of the following Oracle parameters should never be modified in the file init.ora? There are 2 correct answers to this question.

- A. row_cache_cursors
- B. db_block_size
- C. shared_pool_size
- D. db_block_buffers
- E. db_name

Correct Answer: BE

QUESTION 5

You have developed repository objects for AS ABAP-based SAP systems. Your development work is being logged within a transport request. What happens when you release your task in the Transport Organizer (transaction SE09) of the development system? Please choose the correct answer.

- A. Repository locks are released for the respective repository objects.
- B. The repository objects can no longer be changed.
- C. Object entries are copied into the object list of the transport request for the respective repository objects.
- D. The export process starts.

Correct Answer: C
