- B. Switch to expert mode
- C. Skip SPAM update
- D. Search for newer SPAM version in „...EPS\in"-directory

Correct Answer: CD

---

### QUESTION 3

What are prerequisites if you want to support web scenarios using the HTTP protocol in an AS ABAP-based SAP system?

There are 2 correct answers to this question.

- A. The Internet Communication Manager has to be started.
- B. The Logical port has to be defined for the HTTP protocol.
- C. The Server port has to be defined for the HTTP protocol.
- D. The SAP Web Dispatcher has to be started.

Correct Answer: AC

---

#### QUESTION 4

Your company is running an AS ABAP-based SAP System. The employees use SAP GUI for Windows. You want to enable front end printing for all employees which are using the SAP system. What are possible steps to fulfill this requirement?

- A. Create an output device with the host spool access method "G" and assign the host printer "\_\_DEFAULT" to it.
- B. Create an output device with the host spool access method "S" and assign the device type "SAP\_SPRINT" to it.
- C. Create an output device with access method "LOCL" for each local front end printer.
- D. Create an output device "TemSe" and a batch job which redirects the output requests to the local PCs periodically.

Correct Answer: A

---

#### QUESTION 5

Which statements are correct?

There are 2 correct answers to this question.

- A. Real Application Clusters also supports all Oracle backup and archiving features that are available in single instance Oracle databases.
- B. SAP only supports RAC on systems with a cluster filesystem.
- C. Migration to Oracle Real Application Clusters is relatively easy where unloading and loading of data is necessary.
- D. While with a standard cluster solution you effectively use just one active database instance, RAC makes it possible to use several instances simultaneously.

Correct Answer: AD
