QUESTION 1

Which of the following statements regarding the monitoring of an AS ABAP + Java system are true, when you are using a separate central monitoring system? Please choose the correct answer

A. For monitoring an AS ABAP + Java-based SAP system, you will use the agent SAPCCMSR for monitoring the AS Java.

B. The central monitoring system must be of a higher SAP release of the monitored SAP system.

C. Central monitoring of AS ABAP + Java-based SAP systems can only be carried out using a separate AS ABAP + Java-based SAP system.

D. The central monitoring system must have the System ID "CEN".

Correct Answer: A

QUESTION 2

How can you achieve that a change request containing only one ABAP program from the DEV system will be imported into several clients of the QAS system? (More than one answers are true)

A. It is impossible to achieve this with TMS

B. By using client dependent transport routes

C. By using transport target groups

D. By defining different consolidation routes pointing from the DEV system to the QAS system

Correct Answer: B

QUESTION 3

What system behavior can be achieved by using specific profile parameters in AS ABAP- based SAP systems? There are 2 correct answers to this question.

A. You can generally deactivate authorization checks in the complete SAP system (for example, in Sandbox systems).

B. You can set the minimum password length.

C. You can enable an emergency "master user", named "SAP_ALL".

D. You can set an expiration time for passwords.

Correct Answer: BD

QUESTION 4

Which of the following is true when creating new clients within an SAP System based on AS ABAP (for example, SAP ECC)?

A. Customizing and repository objects from a source client are automatically copied to the new client using the client copy tool.

B. Remote client copies generate large data files at the operating system level.

C. Log files indicating the success of a new client creation are stored in the home directory of the user initiating the copy.

D. The client transport tool can be used to transfer the same source client, simultaneously, from one SAP System to multiple other SAP systems in a single action.

E. The client copy can be accelerated by using several dialog work processes in parallel.

Correct Answer: E

QUESTION 5

After the installation of an SAP ECC 6.0 three-system landscape, you plan to apply a Support Package stack to the Development system. Which statements concerning support packages for ABAP based SAP Systems are true? (Choose two)

A. To use the SPAM transaction, you need to configure the transport environment with STMS in the client

000.

B. If there are modification adjustments necessary, transaction SPAM does not start the import. You need to perform these adjustments before importing the Support Package.

C. To use the SPAM, a valid transport landscape must have been created.

D. To use the SPAM transaction, you need to configure the transport environment with transaction STMS in the client 066 with user DDIC.

Correct Answer: AC
