QUESTION 1

You want to develop a program that processes character type data. When you implement the program, you can either use the classical string statements or the newer string expressions and functions.

What are the main benefits of using the newer string expressions and string functions? (Choose two.)

- A. You can write compact syntax instead of a long sequence of statements.
- B. You can reduce the number of intermediate variables.
- C. You can write code that is very easy to read and understand.
- D. You can improve the performance significantly.

Correct Answer: AB

QUESTION 2

Compared to a predefined ABAP type what additional properties can be assigned to a domain? (Choose three.)

- A. Fixed values
- B. Conversion exits
- C. Value tables
- D. Parameter IDs
- E. Search helps

Correct Answer: ABC
