QUESTION 1

Which of the following statements regarding refreshing mode in BEx Analyzer is correct?

A. The "pause automatic refresh" option should only be used when you perform ad hoc analysis directly against an InfoProvider.

B. The "pause automatic refresh" option is the best practice option. You only use the "automatic refresh" option for special scenarios to optimize the use of the OLAP processor.

C. The "automatic refresh" option is the best practice option. You only use the "pause automatic refresh" if you want to define more than one filter and send them all to the OLAP processor.

D. The "pause automatic refresh" option prevents automatic data refreshes when you report against VirtualProviders with real-time data access.

Correct Answer: C

QUESTION 2

What is the benefit of implementing data warehousing for reporting and analysis?
