QUESTION 1

You must ensure that a bill of material will explode to generate sub-items in ascending order. What controls this functionality? Choose the correct answer.

- A. The item category group of the material master in the sub-item
- B. The item usage during the item category determination of each sub-item
- C. The item type in the item category of the main item
- D. The structure scope in the item category of the main item

Correct Answer: D

QUESTION 2

When using new output management in SAP S/4HANA, how does the system process a BRF+ decision table to retrieve the required result? Choose the correct answer.

- A. Every row is processed in sequence. In each row, every condition column cell is processed from right to left. If the condition in each condition column cell is met, the field values in the result columns are returned.
- B. Every condition column is processed in sequence. In each condition column, every row is processed from top to bottom. If the condition in each condition column cell is met, the field values in the result columns are returned.
- C. Every row is processed in sequence. In each row, every result column cell is processed from left to right. If the condition in each result column cell is met, the field values in the condition columns are returned.
- D. Every row is processed in sequence. In each row, every condition column cell is processed from left to right. If the condition in each condition column cell is met, the field values in the result columns are returned.

Correct Answer: D
