QUESTION 1

You want to plan a finished material using material requirements planning in an SAP ECC system. The resulting planned orders should be scheduled using basic date scheduling (not lead-time scheduling).

Which of the following properties for the resulting dependent requirements applies?

- A. In multi-level backward scheduling, dependent requirements are calculated to the exact second.
- B. If the individual material components are explicitly assigned to the operations of a routing, the requirement dates of the dependent requirements are scheduled at each start date of the operations.
- C. When a customer order is created for the finished material, the dependent requirements are automatically triggered for the components in the bill of material without a planning run.
- D. In multi-level backward scheduling, dependent requirements are triggered at the start date for the planned order of the finished material.

Correct Answer: D

QUESTION 2

Which function is supported by production orders?

- A. Automatic selection of a work center at order release
- B. Automatic creation of transfer orders at order release
- C. Automatic reading of PP master data at order release
- D. Automatic printing of order documents at order creation

Correct Answer: B

QUESTION 3

Which of the following elements can be used in a process order? (Choose three)

- A. Process instructions
- B. Parallel sequences
- C. Relationships
- D. Suboperations
- E. Phases

Correct Answer: ACE

QUESTION 4

When maintaining a work center, formulas can be assigned in the scheduling view. Formulas use formula parameters for calculation.

What can be the origin of the formula parameters used for scheduling? (Choose three)

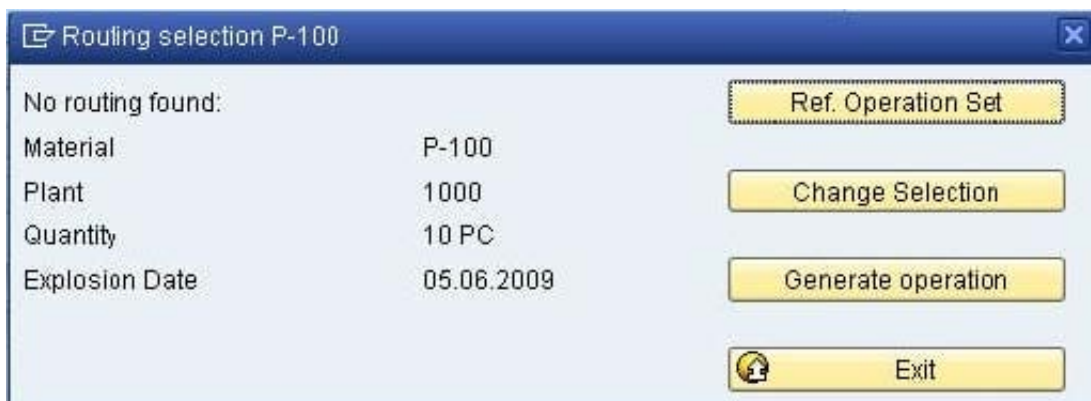

- A. User-defined fields in the operation of routings
- B. General operation values of routings
- C. General item values of bill of materials
- D. General values from work scheduling view of the material master
- E. Standard values in the operations of routings

Correct Answer: ABE

QUESTION 5

In which scenario will the error message shown in the attached screenshot occur?

Exhibit:

Exhibit

- A. A valid routing exists, but the material master is set to manual routing selection.
- B. A valid routing exists, but the Customizing for the order type is set to manual routing selection.
- C. The routing is not valid at the explosion date.
- D. The selection method is set to "selection only by production version" in the material master.

Correct Answer: C
