QUESTION 1

Which of the following scheduling types can only be used in capacity planning?

- A. Midpoint
- B. Forward
- C. Only capacity requirements
- D. Backward

Correct Answer: A

QUESTION 2

Where can you define the default storage location for the material component of a production order? (Choose three)

- A. Routing
- B. Production supply area of a work center
- C. BOM header (product)
- D. Production version (product)
- E. Material master (component)

Correct Answer: BDE

QUESTION 3

You have maintained planning strategy group 10 (make-to-stock production) in the material master (SAP ECC) of a material. For the coming months, you have planned requirements with requirement type LSF (derived from main strategy 10). Now, you want to change the requirement type from LSF to VSF (in accordance with planning strategy 40, planning with final assembly) for requirements in the existing production plan.

Which of the following scenarios are applicable in this case? (Choose two)

- A. You can enter the strategy group 40 in the material master, but the requirement type is not changed automatically for existing requirements.
- B. You must change the requirement type for planning strategy 10 to VSF in Customizing. The requirement type for all existing requirements is then changed by the next planning run.
- C. You can change the strategy group from 10 to 40 for the existing production plan in the material master, and the requirement type for all requirements is changed automatically.
- D. You can enter the strategy group 40 in the material master and change the present requirement for the product

manually in the production plan.

Correct Answer: AD

QUESTION 4

Which property applies for consumption with planning strategy 40 (planning with final assembly)?

- A. Consumption can result in subsequent adjustments of planned receipts.
- B. Consumption can reduce the originally planned production quantity.
- C. Consumption takes place with the planning material.
- D. Consumption creates a static and binding assignment between the planned independent requirements and the customer requirements for the entire procurement process.

Correct Answer: A

QUESTION 5

During the processing of production orders planned and actual costs are determined. On which of the following objects can you collect these costs? (Choose two)

- A. Production order
- B. Product cost collector
- C. Work center
- D. Planned order

Correct Answer: AB
