QUESTION 1

An agricultural corporation that paid 53% in income tax wanted to build a grain elevator designed to last twenty-five (25) years at a cost of \$80,000 with no salvage value. Annual income generated would be \$22,500 and annual expenditures were to be \$12,000.

Answer the question using a straight line depreciation and a 10% interest rate.

Which of the following should be included in the life-cycle cost analysis of a power plant?

- A. Construction cost, operating cost, maintenance cost
- B. Factory expenses, distribution expenses, mark-up
- C. Capacity factor, end product units, physical dimensions
- D. Resources, work activities, final cost objects

Correct Answer: A

QUESTION 2

Given the two organization structures below, answer the question.

The following question requires your selection of CCC/CCE Scenario 28 (3.7.50.1.7) from the right side of your split screen, using the drop down menu, to reference during your response/choice of responses. Given a unit price contract between the owner and contractor, each assumes the following:

- A. Bid unit rate, owner quantities can exceed estimate range Contractor can perform above
- B. Bid unit rate, owner quantities are within estimate range
- C. Contractor can perform at or below bid unit rate, owner quantities can exceed estimate range
- D. Contractor can perform at or below bid unit rate, owner quantities are within estimate range

Correct Answer: D

QUESTION 3

An agricultural corporation that paid 53% in income tax wanted to build a grain elevator designed to last twenty-five (25) years at a cost of \$80,000 with no salvage value. Annual income generated would be \$22,500 and annual expenditures were to be \$12,000.

Answer the question using a straight line depreciation and a 10% interest rate.

The following question requires your selection of CCC/CCE Scenario 17 (4.2.50.1.1) from the right side of your split screen, using the drop down menu, to reference during your response/choice of responses.

All of the following are included in "income tax" calculations except:

- A. Annual income
- B. Annual expenditures
- C. Depreciation
- D. Initial cost of investment

Correct Answer: D

QUESTION 4

An agricultural corporation that paid 53% in income tax wanted to build a grain elevator designed to last twenty-five (25) years at a cost of \$80,000 with no salvage value. Annual income generated would be \$22,500 and annual expenditures were to be \$12,000.

Answer the question using a straight line depreciation and a 10% interest rate.

The main financial objective of many enterprises is:

- A. To maximize the total long-term economic return
- B. Subject to a well-conceived quality control plan
- C. To balance opportunities and risks
- D. Dependent on the backlog projects and the availability of resources

Correct Answer: A

QUESTION 5

_____ is defined as the earned work hours or dollars for all accounts divided by the budgeted work hours or dollars for all accounts.

- A. Percent complete
- B. Cost to complete
- C. Earned value
- D. Forecast

Correct Answer: A
