QUESTION 1

SCENARIO

Please use the following to answer the next question:

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores. Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales. The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's Questions: on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well. The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a QUESTION, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure. The answer is given through the figure's integrated speakers, making it appear as though that the toy is actually responding to the child's QUESTION. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this.

In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of the home and have the character's abilities remain intact.

To ensure GDPR compliance, what should be the company's position on the issue of consent?

- A. The child, as the user of the action figure, can provide consent himself, as long as no information is shared for marketing purposes.
- B. Written authorization attesting to the responsible use of children's data would need to be obtained from the supervisory authority.
- C. Consent for data collection is implied through the parent's purchase of the action figure for the child.
- D. Parental consent for a child's use of the action figures would have to be obtained before any data could be collected.

Correct Answer: D

QUESTION 2

According to Art 23 GDPR, which of the following data subject rights can NOT be restricted?

- A. Right to restriction of processing.
- B. Right to erasure ("Right to be forgotten").
- C. Right to lodge a complaint with a supervisory authority.
- D. Right not to be subject to automated individual decision-making

Correct Answer: A

QUESTION 3

SCENARIO

Please use the following to answer the next question:

Brady is a computer programmer based in New Zealand who has been running his own business for two years. Brady's business provides a low-cost suite of services to customers throughout the European Economic Area (EEA). The services are targeted towards new and aspiring small business owners. Brady's company, called Brady Box, provides web page design services, a Social Networking Service (SNS) and consulting services that help people manage their own online stores.

Unfortunately, Brady has been receiving some complaints. A customer named Anna recently uploaded her plans for a new product onto Brady Box's chat area, which is open to public viewing. Although she realized her mistake two weeks later and removed the document, Anna is holding Brady Box responsible for not noticing the error through regular monitoring of the website. Brady believes he should not be held liable.

Another customer, Felipe, was alarmed to discover that his personal information was transferred to a third-party contractor called Hermes Designs and worries that sensitive information regarding his business plans may be misused. Brady does not believe he violated European privacy rules. He provides a privacy notice to all of his customers explicitly stating that personal data may be transferred to specific third parties in fulfillment of a requested service. Felipe says he read the privacy notice but that it was long and complicated

Brady continues to insist that Felipe has no need to be concerned, as he can personally vouch for the integrity of Hermes Designs. In fact, Hermes Designs has taken the initiative to create sample customized banner advertisements for customers like Felipe. Brady is happy to provide a link to the example banner ads, now posted on the Hermes Designs webpage. Hermes Designs plans on following up with direct marketing to these customers.

Brady was surprised when another customer, Serge, expressed his dismay that a quotation by him is being used within a graphic collage on Brady Box's home webpage. The quotation is attributed to Serge by first and last name. Brady, however, was not worried about any sort of litigation. He wrote back to Serge to let him know that he found the quotation within Brady Box's Social Networking Service (SNS), as Serge himself had posted the quotation. In his response, Brady did offer to remove the quotation as a courtesy.

Despite some customer complaints, Brady's business is flourishing. He even supplements his income through online behavioral advertising (OBA) via a third-party ad network with whom he has set clearly defined roles. Brady is pleased that, although some customers are not explicitly aware of the OBA, the advertisements contain useful products and services.

Based on the scenario, what is the main reason that Brady should be concerned with Hermes Designs' handling of customer personal data?

- A. The data is sensitive.
- B. The data is uncategorized.

- C. The data is being used for a new purpose.
- D. The data is being processed via a new means.

Correct Answer: C

QUESTION 4

What should a controller do after a data subject opts out of a direct marketing activity?

- A. Without exception, securely delete all personal data relating to the data subject.
- B. Without undue delay, provide information to the data subject on the action that will be taken.
- C. Refrain from processing personal data relating to the data subject for the relevant type of communication.
- D. Take reasonable steps to inform third-party recipients that the data subject's personal data should be deleted and no longer processed.

Correct Answer: C

QUESTION 5

According to the GDPR, what is the main task of a Data Protection Officer (DPO)?

- A. To create and maintain records of processing activities.
- B. To conduct Privacy Impact Assessments on behalf of the controller or processor.
- C. To monitor compliance with other local or European data protection provisions.
- D. To create procedures for notification of personal data breaches to competent supervisory authorities.

Correct Answer: C
