QUESTION 1

Which of the following occurs when an individual takes a specific observable action to indicate and confirm that they give permission for their information to be processed?

- A. Express consent.
- B. Implied consent.
- C. Informed notice.
- D. Authorized notice.

Correct Answer: A

Express consent occurs when an individual takes a specific observable action to indicate and confirm that they give permission for their information to be processed. <https://niccs.cisa.gov/education-training/catalog/international-association-privacy-professionals-iapp/certified-1>

QUESTION 2

What is the main benefit of using a private cloud?

- A. The ability to use a backup system for personal files.
- B. The ability to outsource data support to a third party.
- C. The ability to restrict data access to employees and contractors.
- D. The ability to cut costs for storing, maintaining, and accessing data.

Correct Answer: C

QUESTION 3

An organization has recently experienced a data breach where large amounts of personal data were compromised. As part of a post-incident review, the privacy technologist wants to analyze available data to understand what vulnerabilities may have contributed to the incident occurring. He learns that a key vulnerability had been flagged by the system but that detective controls were not operating effectively. Which type of web application security risk does this finding most likely point to?

- A. Insecure Design.
- B. Misconfiguration.
- C. Vulnerable and Outdated Components.
- D. Logging and Monitoring Failures.

Correct Answer: D

if an organization has recently experienced a data breach where large amounts of personal data were compromised and a post-incident review reveals that a key vulnerability had been flagged by the system but that detective controls were not operating effectively, this finding most likely points to logging and monitoring failures as a type of web application security risk. Effective logging and monitoring can help detect and respond to security incidents in a timely manner.

QUESTION 4

Which of the following is a vulnerability of a sensitive biometrics authentication system?

- A. False positives.
- B. False negatives.
- C. Slow recognition speeds.
- D. Theft of finely individualized personal data.

Correct Answer: C

QUESTION 5

Which is NOT a drawback to using a biometric recognition system?

- A. It can require more maintenance and support.
- B. It can be more expensive than other systems
- C. It has limited compatibility across systems.
- D. It is difficult for people to use.

Correct Answer: A
