QUESTION 1

When messages are encrypted and digitally signed to protect documents transferred between trading partners, the GREATEST concern is that:

- A. trading partners can repudiate the transmission of messages.
- B. hackers can eavesdrop on messages.
- C. trading partners can repudiate the receipt of messages.
- D. hackers can introduce forgery messages.

Correct Answer: D

QUESTION 2

What should be an information security manager's FIRST step when developing a business case for a new intrusion detection system (IDS) solution?

- A. Calculate the total cost of ownership (TCO).
- B. Define the issues to be addressed.
- C. Perform a cost-benefit analysis.
- D. Conduct a feasibility study.

Correct Answer: C

QUESTION 3

Which of the following is the MOST important consideration when establishing an information security governance framework?

- A. Security steering committee meetings are held at least monthly.
- B. Members of the security steering committee are trained in information security.
- C. Business unit management acceptance is obtained.
- D. Executive management support is obtained.

Correct Answer: D

QUESTION 4

When an information security manager presents an information security program status report to senior management, the MAIN focus should be:

- A. critical risks indicators.
- B. key controls evaluation.
- C. key performance indicators (KPIs).
- D. net present value (NPV).

Correct Answer: C

QUESTION 5

An organization has to comply with recently published industry regulatory requirements -- compliance that potentially has high implementation costs. What should the information security manager do FIRST?

- A. Implement a security committee.
- B. Perform a gap analysis.
- C. Implement compensating controls.
- D. Demand immediate compliance.

Correct Answer: B

Since they are regulatory requirements, a gap analysis would be the first step to determine the level of compliance already in place. Implementing a security committee or compensating controls would not be the first step. Demanding immediate compliance would not assess the situation.
