QUESTION 2

The contribution of recovery point objective (RPO) to disaster recovery is to:

- A. define backup strategy.
- B. eliminate single points of failure.
- C. reduce mean time between failures (MTBF).
- D. minimize outage period.

Correct Answer: D

QUESTION 3

Which of the following is a potential indicator of inappropriate Internet use by staff?

- A. Increased help desk calls for password resets
- B. Reduced number of pings on firewalls
- C. Increased reports of slow system performance
- D. Increased number of weakness from vulnerability scans

Correct Answer: C

QUESTION 4

Reviewing which of the following would BEST ensure that security controls are effective?

- A. Risk assessment policies

- B. Return on security investment
- C. Security metrics
- D. User access rights

Correct Answer: C

Reviewing security metrics provides senior management a snapshot view and trends of an organization's security posture. Choice A is incorrect because reviewing risk assessment policies would not ensure that the controls are actually working. Choice B is incorrect because reviewing returns on security investments provides business justifications in implementing controls, but does not measure effectiveness of the control itself. Choice D is incorrect because reviewing user access rights is a joint responsibility of the data custodian and the data owner, and does not measure control effectiveness.

QUESTION 5

Fingerprint biometrics are BEST used for:

- A. identification
- B. authorization
- C. authentication
- D. access control

Correct Answer: A
