Correct Answer: D

---

### QUESTION 3

What is the PRIMARY security concern associated with the practice known as Bring Your Own Device (BYOD) that might affect a large organisation?

- A. Most BYOD involves the use of non-Windows hardware which is intrinsically insecure and open to abuse.
- B. The organisation has significantly less control over the device than over a corporately provided and managed device.
- C. Privately owned end user devices are not provided with the same volume nor frequency of security patch updates as a corporation.
- D. Under GDPR it is illegal for an individual to use a personal device when handling personal information under corporate control.

Correct Answer: A

---

#### QUESTION 4

What Is the PRIMARY difference between DevOps and DevSecOps?

- A. Within DevSecOps security is introduced at the end of development immediately prior to deployment.
- B. DevSecOps focuses solely on iterative development cycles.
- C. DevSecOps includes security on the same level as continuous integration and delivery.
- D. DevOps mandates that security is integrated at the beginning of the development lifecycle.

Correct Answer: C
