QUESTION 1

You've just become the administrator for the Jenkins server, and the feedback you've received from the users is they're having trouble locating their jobs to run them. You've determined that folders are the most logical solution and wish to move the jobs into the new folders you've created. How would you accomplish this?

- A. All of these
- B. Click existing item; in the item view page, select "move" on the left panel; select target folder.
- C. For new items, click folder; in the folder view, select new item; it will automatically be added to that folder.
- D. Hover and click arrow on existing item, choose "move", select target folder.

Correct Answer: B

All of these options are ways to add projects to folders.

QUESTION 2

Your organization has been carefully and painstakingly performing builds on specific commits which the development team deems as releases or release candidates and subsequently only testing major releases. You have been placed in charge of a new project in which continuous integration is the primary goal. Which part of your organization's existing process do you need to modify in the furtherance of the goal of continuous integration?

- A. Building every commit.
- B. Maintaining a single source repository.
- C. Building everything manually with great care.
- D. Making Builds Self-Testing.

Correct Answer: C

A good CI process should contain all the above, except it should no longer contain a manual build process.

QUESTION 3

Which are true when installing new plugins? Choose 2 answers

- A. If you check the "Enable rollbacks when upgrading" box, future updates to the plugin can easily be rolled back when necessary.
- B. The previous public release of a plugin is installed for reliability instead of installing the most recent public release.
- C. Most plugins can be installed without stopping and starting Jenkins.
- D. You must install all required and optional dependencies before installing the plugin with the plugin manager.
- E. If you are running Jenkins under an HTTP proxy, you must configure HTTP proxy access for the plugin manager

before Installing or updating plugins.

Correct Answer: AC

QUESTION 4

Which answer best describes continuous integration?

- A. A software development discipline where software is built so that it can be released to production at any time.
- B. A software development discipline where software is released continuously as part of an automated pipeline.
- C. Building in 60 minutes or less.
- D. A software development practice where contributors are integrating their work very frequently.

Correct Answer: D

Continuous integration doesn't mean that software can or will be released or pushed to production continuously.

QUESTION 5

A unit test_____.

- A. tests an Individual unit a component
- B. verifies cross-functionalities
- C. verifies that the complete software matches the specifications it was written to fulfill
- D. is written when an Integration or multi-environment bog is fixed

Correct Answer: A
