- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

Your co-worker was installing a Jenkins instance and went home for the night. When they returned the next day they notice their machine had rebooted, the scrollback of the installation was unretrievable, and they've come to you for help. In what location will you need to look at it to retrieve the initialAdminPassword?

- A. /opt/jenkins/
- B. /var/lib/jenkins/secrets/
- C. /tmp/Jenkins/
- D. /usr/lib/jenkins/password/

Correct Answer: B

You'll find it in /var/lib/jenkins/secrets/.

---

### QUESTION 2

Jenkins, along with several other automation platforms, provides developers and operators with tools that allow them to automate the deployment of environments with preconfigured source code, including the CI pipeline. What is this called?

- A. Continuous Integration
- B. Continuous Deployment
- C. Continuous Delivery
- D. Infrastructure as Code

Correct Answer: D

"Infrastructure as code" means some or all of the state of your infrastructure is defined in source code. This is achieved through configuration management tools, like Puppet and Chef. The continuous integration component of infrastructure is defined in the Jenkinsfile, which lives amongst the project source code, illustrating infrastructure as code.

---

### QUESTION 3

Which is the expected workflow for "test-Driven Development"?

- A. Validate with the CI system, write the new functional code, and then verify that the test passes.
- B. Write a new test, validate with the a system, and then write the new functional code.
- C. Write a new falling unit test, write the new functional code to fix the test, verify that the test passes, and then refactor the code.

D. Write a new failing unit test, write the new functional code to fix the test, and then verify that the test passes.

Correct Answer: C

---

#### QUESTION 4

Which isn't a common Jenkins build tool?

- A. Ant
- B. Excel
- C. Docker
- D. Gradle

Correct Answer: B

Excel is not used to build things.

---

#### QUESTION 5

What's the difference between authentication and authorization?

- A. None of these
- B. Authorization is more strict
- C. Authorization identifies a user, while authentication dictates what a user is allowed to do.
- D. Authentication identifies a user, while authorization dictates what a user is allowed to do.

Correct Answer: D

Authorization and authentication are different but related concepts. They don't vary or indicate a level of strictness.
