QUESTION 1

Where do you find alerts about Jenkins security issues? Choose 3 answers

- A. Beekeeper Upgrade Assistant if you are running CloudBees Jenkins Distribution or CloudBees Core.
- B. An email message that is automatically sent to all users who have registered with the mailing list at Jenklnsd-advisories@googlegroups.com.
- C. A banner displayed in the upper right section of the master's home page.
- D. An email message sent to all users who are listed in the "Send security notifications" field of the "Extended E-mail Notification" configuration.
- E. Jenkins logs.

Correct Answer: CDE

QUESTION 2

DevOps teams can implement traceability of artifacts in a continuous delivery pipeline by using

- A. the Downstream Builds plugin
- B. manual recording
- C. the Pipeline plugin to fingerprint files
- D. Pipeline labels

Correct Answer: C

QUESTION 3

Which of the following are true about credentials that are implemented in a Declarative Pipeline using the "credentials" or "withCredentials()" method?

Choose 2 answers

- A. All credential bindings support the "Secret Text" and "Standard username and password" credential types.
- B. Credential IDs are case insensitive.
- C. The credential types supported are defined by the binding plugin (or the resource being accessed).
- D. Most credentials called from a pipeline have Global scope, not System scope.

Correct Answer: AB

QUESTION 4

You are using GitHub repository scanning (in a project of type "GitHub Organization") with the Pipeline Jenkinsfile Project Recognizer. In this case, which repositories under the organization will have Multibranch projects automatically created for them?

- A. only repositories that contain a Jenkinsfile in all their branches
- B. only repositories that contain a Jenkinsfile in at least one branch
- C. all repositories that contain a Jenkinsfile in at least one branch or pull request
- D. all repositories

Correct Answer: A

QUESTION 5

When you upgrade a plugin and find an issue in the new version, how can you move back to the previously installed version? Choose 2 answers

- A. Use the pluginManager.downgrade method in the script console.
- B. Select the version you want to use in the global configuration section for this plugin.
- C. Select one of the previous versions in the Plugin Manager.
- D. Manually download and install the previously installed version.
- E. Use the "downgradeplugin" command in the Jenkins CLI
- F. Use the button on the Plugin Manager that allows a downgrade to the previously installed version.

Correct Answer: DF
