QUESTION 1

An organization\\\'s web developers and operations personnel use different systems. How will increasing communication between the teams reduce issues caused by silos?

A. By assigning blame for failures and establishing consequences

B. By combining job role responsibilities to ensure that everyone has shared access

C. By increasing data encryption to strengthen workflows

D. By emphasizing shared ownership of business outcomes

Correct Answer: D

QUESTION 2

You are leading projects in an IT services company. Your customer\\\'s project requires analyzing im-ages. They have many 10s of 1000s of raw images that they have made available to you. Your small technology team needs to build a machine learning model. The images are unlabeled. You don\\\'t have the people or the capacity to label the images. What is your approach?

A. Look for open-source labeled images that closely resemble the given images.

B. Request data labeling service from Google.

C. Tell the customer it is their duty to label the images.

D. Hire temporary workers who can quickly label the images.

Correct Answer: C

Google\\\'s Data Labeling Service lets you work with human labelers to generate highly accurate labels for a collection of data that you can use in machine learning models.

QUESTION 3

How would an organization benefit from using Looker?

A. Optimal identity and access management

B. Leading serverless warehousing technology

C. Robust data roll-back accuracy

D. Advanced business intelligence and analytics

Correct Answer: D

Looker is a business intelligence software and big data analytics platform that helps you explore, analyze and share real-time business analytics easily.

QUESTION 4

An organization is struggling to meet user demand for change and wants to modernize their legacy applications by moving the applications to the cloud Why would this help the organization satisfy user expectations\\'?

A. Toil automation helps make automatic updates

B. Updates can be pushed out more quickly to repair bugs

C. Customer data can be used to offer tailored content

D. DevOps requires that industry trends be measured and tracked

Correct Answer: B

Moving legacy applications to the cloud can help organizations satisfy user expectations by enabling them to push out updates more quickly to repair bugs.

QUESTION 5

An organization recently launched a virtual customer support agent, generating vast amounts of text and speech data. Why should they use a cloud data warehouse to interpret this data?

A. To natively visualize both types of data using a dashboard in real time

B. To ingest and analyze structured and unstructured data at scale, in real time

C. To secure data transmission between cloud and on-premises environments

D. To transform data from structured to unstructured

Correct Answer: B

Real-time data ingestion and updates. A simple and universal solution for continually ingesting your enterprise data into popular cloud-based data warehouses in real time. https://www.qlik.com/us/cloud-data-migration/cloud-data-warehouse
