### QUESTION 1

Which definition best characterizes the term "traceability" in terms of requirements engineering? (2 Points)

- A. Traceability of the effort for the elicitation of requirements, beginning with the elicitation of the documentation right to the point of requirements acceptance
- B. Monitoring of progress in requirements elicitation
- C. Ability to analyze requirements for contradictory content, especially between the requirements specifications and the test cases
- D. Traceability of the requirements, along with the associated documents, from the requirements elicitation to the implementation
- E. Level of stabilisation between the elicited and approved requirements

Correct Answer: D

---

### QUESTION 2

In requirements engineering, the use of model-based documentation is very helpful. Behaviour, functions and the structures of the entity being considered can be represented with diagrams. Which two of the following diagrams help to represent the structural perspective of the requirements model? (1 Point)

- A. Entity-relationship diagram
- B. State diagram
- C. Deployment diagram
- D. Class diagram
- E. Data diagram

Correct Answer: AD

---

### QUESTION 3

Which of the following elements are elements of a state diagram and which are not? Please indicate true or false. (1 Point)

True	False	
A	B	Event
C	D	Initial state
E	F	State Transition
G	H	Interaction
H	I	Actor

A. A, C, E, H, I

Correct Answer: A

#### QUESTION 4

Requirements elicitation: Your company has received a customer contract to develop a system for the scheduling of the customer's delivery vans. It is your task to identify the requirements for this scheduling system. You have arranged appointments for interviews with three key members of the customer's staff, and are now preparing interview questions. Which of the questions below are appropriate interview questions for the requirements elicitation? (2 Points)

- A. What are the most important technical terms for the application and how are they defined?
- B. If the delivery deadline is not met, is a contract penalty to be paid?
- C. What data quantities / data rates are to be processed?
- D. When is the installation of the completed system to be started?

Correct Answer: C

#### QUESTION 5

As a requirements engineer, you deal with a diverse range of requirements. A template for natural language functional requirements can help you to formulate different forms of system activities in a more precise way. Which two kinds of system activities are among those supported? (1 Point)

- A. User interaction
- B. Technical requirement
- C. Quality requirements
- D. Independent system activity
- E. System requirement

Correct Answer: AD
