### QUESTION 1

A developer creates a custom controller and a custom Visualforce page by using the code block below:

```
public class MyController {  
    public String myString {  
        get {  
            if (myString == null) { myString = 'a';  
            }  
            return myString;  
        } private set; } public string getMyString () {  
            return 'getMyString';  
        } public string getStringMethod () {  
            if (myString == null) {  
                myString = 'b';  
            } return myString;  
        }  
    } {!StringMethod}, {!myString}, {!myString}
```

What can the user expect to see when accessing the custom page?

- A. A, a, a
- B. B, b, b
- C. A, b, getMyString
- D. B, a, getMyString

Correct Answer: A

---

### QUESTION 2

Which type of code represents the Model in the MVC architecture on the Force.com platform?

- A. A Controller Extension method that uses SOQL to query for a list of Account records
- B. Custom JavaScript that processes a list of Account records.

- C. A list of Account records returned from a Controller Extension method
- D. A Controller Extension method that saves a list of Account records

Correct Answer: C

---

### QUESTION 3

Cloud kicks has a multi-screen flow its call center agents use when handling inbound service desk calls.

At one of the steps in the flow, the agents should be presented with a list of order number and dates that are retrieved from an external order management system in real time and displayed on the screen.

What should a developer use to satisfy this requirement?

- A. An invoke method
- B. An apex REST class
- C. An outbound message
- D. An Apex Controller

Correct Answer: B

---

### QUESTION 4

What are two considerations for custom Apex Exception classes? Choose 2 answers.

- A. Custom Exceptions cannot be extended by other Exception classes.
- B. Custom Exception class names must end with the word '\\Exception\\'.
- C. Custom Exception classes must extend the base Exception class.
- D. Constructor for custom Exceptions can only accept string values as arguments.

Correct Answer: BC

---

### QUESTION 5

What is the result when a Visualforce page calls an Apex controller, which calls another Apex class, which then results in hitting a governor limit?

- A. Any changes up to the error are saved.
- B. Any changes up to the error are rolled back.
- C. All changes before a savepoint are saved.
- D. All changes are saved in the first Apex class.

Correct Answer: B
