QUESTION 1

A university wants to increase the security posture of its network by implementing vulnerability scans of both centrally managed and student/employee laptops. The solution should be able to scale, provide minimum false positives and high accuracy of results, and be centrally managed through an enterprise console. Which of the following scanning topologies is BEST suited for this environment?

- A. A passive scanning engine located at the core of the network infrastructure
- B. A combination of cloud-based and server-based scanning engines
- C. A combination of server-based and agent-based scanning engines
- D. An active scanning engine installed on the enterprise console

Correct Answer: D

QUESTION 2

An organization has two environments: development and production. Development is where applications are developed with unit testing. The development environment has many configuration differences from the production environment. All applications are hosted on virtual machines. Vulnerability scans are performed against all systems before and after any application or configuration changes to any environment. Lately, vulnerability remediation activity has caused production applications to crash and behave unpredictably. Which of the following changes should be made to the current vulnerability management process?

- A. Create a third environment between development and production that mirrors production and tests all changes before deployment to the users
- B. Refine testing in the development environment to include fuzzing and user acceptance testing so applications are more stable before they migrate to production
- C. Create a second production environment by cloning the virtual machines, and if any stability problems occur, migrate users to the alternate production environment
- D. Refine testing in the production environment to include more exhaustive application stability testing while continuing to maintain the robust vulnerability remediation activities

Correct Answer: A

QUESTION 3

A company has received the results of an external vulnerability scan from its approved scanning vendor. The company is required to remediate these vulnerabilities for clients within 72 hours of acknowledgement of the scan results. Which of the following contract breaches would result if this remediation is not provided for clients within the time frame?

- A. Service level agreement
- B. Regulatory compliance
- C. Memorandum of understanding

D. Organizational governance

Correct Answer: A

QUESTION 4

An organization subscribes to multiple third-party security intelligence feeds. It receives a notification from one of these feeds indicating a zero-day malware attack is impacting the SQL server prior to SP 2. The notification also indicates that infected systems attempt to communicate to external IP addresses on port 2718 to download additional payload. After consulting with the organization's database administrator, it is determined that there are several SQL servers that are still on SP 1, and none of the SQL servers would normally communicate over port 2718. Which of the following is the BEST mitigation step to implement until the SQL servers can be upgraded to SP 2 with minimal impact to the network?

- A. Create alert rules on the IDS for all outbound traffic on port 2718 from the IP addresses of the SQL servers running SQL SP 1
- B. On the organization's firewalls, create a new rule that blocks outbound traffic on port 2718 from the IP addresses of the servers running SQL SP 1
- C. Place all the SQL servers running SP 1 on a separate subnet On the firewalls, create a new rule blocking connections to destination addresses external to the organization's network
- D. On the SQL servers running SP 1, install vulnerability scanning software

Correct Answer: B

QUESTION 5

A company just chose a global software company based in Europe to implement a new supply chain management solution. Which of the following would be the MAIN concern of the company?

- A. Violating national security policy
- B. Packet injection
- C. Loss of intellectual property
- D. International labor laws

Correct Answer: A
