QUESTION 1

Which of the following are static techniques?

- A. Walkthrough.
- B. State transition testing.
- C. Decision table testing.
- D. Statement testing.

Correct Answer: A

QUESTION 2

Your task is to compile a test execution schedule for the current release of software.

The system specification states the following logical dependencies:

An admin user must create/amend/delete a standard user.

A standard user is necessary to perform all other actions.

The test plan requires that re-tests must be performed first, followed by the highest priority tests. To save time, the test plan states that tests should be scheduled to create test data for the subsequent tests in the schedule.

The following test cases have been designed, with an indication of priority (1 being the highest priority) and whether the test has previously failed.

| Id | Description | Priority | Failed |
|----|---|----------|--------|
| a | Log in as standard user and create customer account | 2 | Y |
| b | Order one item | 3 | N |
| c | Create invoice for order | 1 | Y |
| d | Order two items or more | 3 | Y |
| e | Log in as admin user and create a standard user | 2 | N |

Which test execution schedule meets the test plan requirements and logical dependencies?

- A. a, d, c, b, e
- B. a, c, b, d, e
- C. e, a, b, c, d
- D. e, a, d, c, b

Correct Answer: C Scenario 10, V2 "Online Application" Testlet 1

While waiting for the responses, the test manager has been asked to prepare test plans to validate the software

application delivered by the successful bidder.

QUESTION 3

What is important to do when working with software development models?

- A. To adapt the models to the context of project and product characteristics.
- B. To choose the waterfall model because it is the first and best proven model.
- C. To start with the V-model and then move to either iterative or incremental models.
- D. To only change the organization to fit the model and not vice versa.

Correct Answer: A

QUESTION 4

Which is not a major task of test implementation and execution?

- A. Develop and prioritizing test cases, creating test data, writing test procedures and optionally, preparing test harness and writing automated test scripts.
- B. Logging the outcome of test execution and recording the identities and versions of the software under test, test tools and testware.
- C. Checking test logs against the exit criteria specified in test planning.
- D. Verifying that the test environment has been set up correctly.

Correct Answer: C

QUESTION 5

A number of options have been suggested for the level of independence to be employed for the testing on the next project, and are shown below.

- i. External test specialists perform non-functional testing.
- ii. Testing is outsourced.
- iii. Testing is carried out by the developer.
- iv.

A separate test team carries out the testing.

v.

Testing is performed by the business.

vi. Testing is performed by a different developer.

Which of the following orders the above in a correct order of independence?

A. i, ii, iv, vi

B. ii, i, v, vi

C. ii, v, i, iii

D. i, iv, v, vi

Correct Answer: B
