QUESTION 1

A company is expanding its cloud hosting services to include storage. Prior to upgrading existing customers with the new service, the testing department needs to validate that users can access the new service without seeing other customer data or company sensitive data also hosted in the cloud environment. Which of the following should be conducted prior to deployment of the new service?

- A. Bandwidth test
- B. Load balancing
- C. Security test
- D. Storage test

Correct Answer: C

QUESTION 2

A public cloud provider recently updated one of its services to provide a new type of application load balancer. The cloud administrator is tasked with building out a proof-of-concept using this new service type. The administrator sets out to update the scripts and notices the cloud provider does not list the load balancer as an available option type for deploying this service. Which of the following is the MOST likely reason?

- A. The administrator can deploy the new load balancer via the cloud provider's web console.
- B. The administrator needs to update the version of the CLI tool.
- C. The administrator needs to write a new script function to call this service.
- D. The administrator is not using the correct cloud provider account.

Correct Answer: B

QUESTION 3

Ann, the lead product developer for a company, just hired three new developers. Ann asked the cloud administrator to give these developers access to the fileshares in the public cloud environment. Which of the following is the BEST approach for the cloud administrator to take?

- A. Clone Ann's account to create three new developer accounts.
- B. Distribute the credentials of Ann's shared account to the three new developers.
- C. Copy the fileshares to each new developer's laptop.
- D. Create a new role to access the fileshares and assign the three new developers.

Correct Answer: D

QUESTION 4

Users at a university are experiencing slow response and performance issues with private cloud services. The university was compromised, and a loss of bandwidth utilization was reported. Without deploying new software, which of the following should be performed to determine the cause of the issues?

- A. Send all logs for all cloud components to an event and incident management system for correlation and review.
- B. Locate all load balancers in the cloud and replace them with the latest version of content delivery controllers.
- C. Install sniffing tools, catalog the type of traffic, and capture all traffic to and from the target systems.
- D. Implement and update an antivirus solution to the cloud infrastructure to detect potential threats.

Correct Answer: C

QUESTION 5

Which of the following can be used to assign priority to specific network traffic?

- A. Load balancing
- B. QoS
- C. NIC teaming
- D. Jumbo frames

Correct Answer: B
