QUESTION 1

A financial services company has a requirement to keep backups on premises for 30 days and off-site for up to seven years to a location that is within 100mi (161km) of the primary datacenter location. Recovery times for backups kept on-site have an RTO of one hour, while recovery times for backups kept off-site have an RTO of four hours. Which of the following solutions BEST solves this requirement?

- A. Implement a full-based backup and recovery solution for backups within 30 days or less. For backups kept longer than 30 days, migrate them to a cloud provider that will host the data within 100mi (161km) of the financial services company's primary datacenter.
- B. Implement a clone-based backup and recovery solution for backups within 30 days or less. For backups kept longer than 30 days, migrate them to a cloud provider that will host the data within 100mi (161km) of the financial services company's primary datacenter.
- C. Implement an incremental-based backup and recovery solution for backups within 30 days or less. For backups kept longer than 30 days, migrate them to a cloud provider that will host the data within 62mi (100km) of the financial services company's primary datacenter.
- D. Implement a snapshot-based backup and recovery solution for backups within 30 days or less. For backups kept longer than 30 days, migrate them to a cloud provider that will host the data within 100mi (161km) of the financial services company's primary datacenter.

Correct Answer: B

QUESTION 2

A storage administrator must choose the best replication methodology for storage.

The datacenters are on opposite sides of the country.

The RPO is 24 hours.

Replication and customer access use the same connections.

Replication should not impact customer access during the day.

Which of the following solutions would BEST meet these requirements?

- A. Asynchronous
- B. Regional
- C. Multiregional
- D. Synchronous

Correct Answer: A

QUESTION 3

When a firewall takes an incoming request for a specific IP address and redirects it to an internal host, which of the following is being used?

- A. NIS
- B. PAT
- C. NAT
- D. NIC

Correct Answer: C

QUESTION 4

A system has the ability to automatically provision additional virtual servers in response to a load increase. This is an example of which of the following cloud features?

- A. Replication
- B. Resource Pooling
- C. Orchestration
- D. Virtual Network

Correct Answer: D

QUESTION 5

A CASB provides the application proxy and web application firewall to a large retailer. All access to the retailer cloud application must originate from the CASB-designated IP addresses. The CASB has known geolocations with known IP addresses. Suddenly, all customers are not able to access the retailer cloud applications.

Which of the following is MOST likely the reason for the issue?

- A. Additional CASB IP addresses were added to the authorized pool
- B. All of the CASB's European datacenters are down
- C. There was federation and SSO misconfiguration
- D. The CASB's SSL/TLS certificate expired

Correct Answer: D
