### QUESTION 1

You are site surveying a network for VoWiFi. You have positioned an AP for a manual survey and are moving away from the AP with a phone in Survey Mode in your hand and you are reading the RSSI value of the signal received from the AP. You have previously determined that the noise floor was approximately -94 dBm on this floor of the building. The phone's documentation does not specify a recommended RSSI or SNR value for best performance.

Based on the information provided and the type of device (VoWiFi phone) you are deploying, what minimum RSSI should you plan for in all areas you are monitoring and where VoWiFi service is desired?

- A. -75 dBm
- B. -72 dBm
- C. -67 dBm
- D. -62 dBm

Correct Answer: C

---

### QUESTION 2

Given:

In your regulatory domain, a Tx Power Level of "1" is equivalent to 17 dBm.

For every integer increment (e.g. from 1 to 2) to the Tx Power Level, the AP's transmit power is halved.

In units of mW, what is the actual transmit power for an AP configured at a Tx Power Level of "4"?

- A. 6.25 mW
- B. 50 mW
- C. 12.5 mW
- D. 8 mW

Correct Answer: A

---

### QUESTION 3

In a PC-based spectrum analyzer, what data chart identifies the overall RF utilization of a specific frequency in the environment being surveyed?

- A. FFT Max Hold
- B. FFT Average

C. Swept Spectrogram

D. Duty cycle

Correct Answer: D

---

#### QUESTION 4

Given: In a site survey deliverable report, you are expected to explain the spectrum measurements taken at the customer's site. What portion of a spectrum analyzer view can be used to determine if a given channel is too active for use as the active channel for a new AP?

A. Device list

B. Frame decode

C. Real time FFT

D. Duty cycle

Correct Answer: D

---

#### QUESTION 5

When deploying long-distance 802.11 bridge links (10 miles / 16 km), what parameter may be critical for improving data flow by reducing retries caused by the long distances?

A. The sequence control field value

B. The acknowledgement timeout threshold

C. The minimum transmit data rate value

D. The CTS-to-self threshold

Correct Answer: B
