### QUESTION 1

When surveying an existing WLAN infrastructure for a possible redesign, you use two Wi-Fi USB adapters to collect RSSI data and two USB spectrum analysis adapters to collect RF spectrum data. Since your laptop doesn't have enough USB ports, you use a 4-port powered USB 3.0 hub. What issues could be caused by the use of USB 3.0 that will impact your site survey?

- A. It does not give you enough bandwidth to collect data coming from all of the adapters.
- B. It does not give you enough power for all four of your adapters.
- C. It generates noise in the 2.4 GHz band, giving you a false perception of the noise floor.
- D. It generates noise in the 5 GHz band, giving you a false perception of the noise floor.

Correct Answer: C

### QUESTION 2

During an RFP analysis, one of the vendors mentioned that you'll need to upgrade your Gigabit Ethernet switches to MultiGig switches to ensure support for 802.11ac and 802.11ax, which both offer data rates over 1Gbps. Why is this not sound advice?

- A. Because neither of the technologies support data rates over 1Gbps
- B. Because 802.11ax doesn't support channel bonding
- C. Management overhead that is normal in WLANs will reduce the throughput of the client devices
- D. Because 802.11ac only supports one spatial stream

Correct Answer: C

### QUESTION 3

When deploying a new WLAN infrastructure using PoE to power the APs, you realize that a known good AP is not powering up. You use the same cable to connect your laptop and connect without any trouble. What is the most likely reason the AP did not power up?

- A. Missing AP licenses in the controller
- B. Spanning-tree convergence
- C. Layer 3 routing
- D. Lack of PoE budget on the switch

Correct Answer: D

#### QUESTION 4

In what circumstance would you not enable DFS channels on a WLAN infrastructure?

- A. In any stadium
- B. In any office complex
- C. In an airport
- D. In any home office

Correct Answer: C

#### QUESTION 5

When deploying APs outdoors, what additional component needs to be used that is not needed indoors?

- A. Antennas
- B. NEMA enclosures
- C. Ethernet cables
- D. PoE

Correct Answer: B
