QUESTION 1

In addition to modulation, coding and spatial streams, what has the most impact on available data rates in a WLAN link?

- A. Output power of the AP above 100 mW
- B. Output power of the client above 100 mW
- C. Antenna gain above 11 dBi
- D. Channel width

Correct Answer: D

QUESTION 2

What antenna would be best for a long distance (more than 5 kilometers) bridge link? Select one:

- A. Panel
- B. Parabolic dish
- C. Patch
- D. Omnidirectional

Correct Answer: B

QUESTION 3

A user reports that his laptop was rebooted this morning and now he cannot connect to the WLAN. No other users are reporting connection problems in his work area. No network configuration changes have been made. Which one of the following is the most likely issue?

- A. The driver was updated and the new version is problematic
- B. The network SSID has changed
- C. Wrong passphrase entered for WPA2 on his laptop
- D. The AP is not allowing his laptop onto the network because it was rebooted and the reboot changed the MAC address

Correct Answer: A

QUESTION 4

What best describes passive scanning used to locate WLANs?

- A. Sending probe requests and listening for probe responses
- B. Scanning in only on frequency band
- C. Listening for beacon frames from the APs
- D. Scanning on only one channel

Correct Answer: C

QUESTION 5

In what kind of device is a mini-PCIe 802.11 adapter most likely to be used?

- A. Desktop
- B. Mobile phone
- C. Laptop
- D. USB adapter

Correct Answer: C
