QUESTION 1

The Chief Technology Officer (CTO) of Ursa Major Solar wants error messages to appear when a future date is detected in a custom AnniversaryDate_c field on the Contact object. Additionally, the CTO wants the ability to translate the error messages.

Which two approaches should an Architect use to fulfill this requirement? (Choose two.)

A. Implement a third -party validation process with translate functionality.

B. Create a trigger on Contact and add an error to the record with a custom label.

C. Create a workflow field update to set the standard ErrorMessage field.

D. Create a validation rule and translate the error message with translation workbench.

Correct Answer: BD

QUESTION 2

Ursa Major Solar\\'s legacy system has a quarterly accounts receivable report that compiles data from the following:

1.

Accounts

2.

Contacts

3.

Opportunities

4.

Orders

5.

Order Line Items

Which issue will an architect have when implementing this in Salesforce?

A. Custom report types CANNOT contain Opportunity data.

B. Salesforce does NOT support Orders or Order Line Items.

C. Salesforce does NOT allow more than four objects in a single report type.

D. A report CANNOT contain data from Accounts and Contacts.

Correct Answer: C

QUESTION 3

A customer is facing locking issued when importing large data volumes of order records that are children in a master-detail relationship with the Account object. What is the recommended way to avoid locking issues during import?

A. Import Account records first followed by order records after sorting order by OrderID.

B. Import Account records first followed by order records after sorting orders by AccountID.

C. Change the relationship to Lookup and update the relationship to master-detail after import.

D. Import Order records and Account records separately and populate AccountID in orders using batch Apex.

Correct Answer: B

QUESTION 4

Universal Containers has a classic encryption for custom fields and is leveraging weekly data export for data backups. During the data validation of exported data, UC discovered that encrypted field values are still being exported as part of the data export.

What should a data architect recommend to make sure decrypted values are exported during data export?

A. Set up a custom profile for data migration user, and assign View Encrypted Data

B. Set up a standard profile for data migration user, and assign View Encrypted Data

C. Create another field to copy data from encrypted field, and use this field in export

D. Leverage Apex class to decrypt data before exporting it

Correct Answer: C

QUESTION 5

Universal Containers has large amount of orders coming in from its online portal. Historically all orders are assigned to a generic user.

Which two measures should a data architect recommend to avoid any performance issues while working with large number of order records? (Choose two.)

A. Clear the role field in the generic user record.

B. Salesforce handles the assignment of orders automatically and there is no performance impact.

C. Create a role at top of role hierarchy and assign the role to the generic user.

D. Create a pool of generic users and distribute the assignment of memory to the pool of users.

Correct Answer: AC
