QUESTION 1

A Storage Administrator has an existing single appliance Dell EMC PowerStore 3000T cluster. An additional PowerStore 9000T has been purchased to add into the existing cluster. How does the administrator proceed?

- A. Additional VLTi links on the ToR switching must be configured for the 9000T to support the increased inter-switch network load
- B. Add the new 9000T appliance into the cluster per the procedure; mixed models of the same type are supported
- C. Remove two of the four NVMe NVRAM drives from the 9000T the caching configuration of all clustered appliances must match
- D. The new appliance cannot be added to the cluster; appliance model and type must match when clustering appliances together

Correct Answer: A

QUESTION 2

From where can a data collection be initiated within Dell EMC PowerStore Manager?

- A. Appliance, node, and storage resource
- B. Cluster, appliance, and alerts
- C. Cluster, appliance, and event log
- D. Node, storage resource, and alerts

Correct Answer: A
