QUESTION 3

DRAG DROP

You have just deployed an SC Series array in Virtual Port Mode. What is the correct sequence of steps to perform an array port failover test?

Select and Place:

Confirm I/O is being received on the selected volume in the DSM GUI	STEP 1
Physically disconnect the port that matches the identified controller port	STEP 2
Send I/O from the host to an exisitng single path volume on the array	STEP 3
Confirm I/O is still being received on the selected volume in the DSM GUI	STEP 4
Confirm the WWN for the controller port intended to failover in the DSM GUI	STEP 5

Correct Answer:

	Confirm I/O is being received on the selected volume in the DSM GUI
	Physically disconnect the port that matches the identified controller port
	Send I/O from the host to an exisitng single path volume on the array
	Confirm the WWN for the controller port intended to failover in the DSM GUI
	Confirm I/O is still being received on the selected volume in the DSM GUI

QUESTION 4

What is the maximum memory supported on a single SC9000 controller?

A. 64 GB

B. 96 GB

C. 128 GB

D. 256 GB

Correct Answer: D
