### QUESTION 1

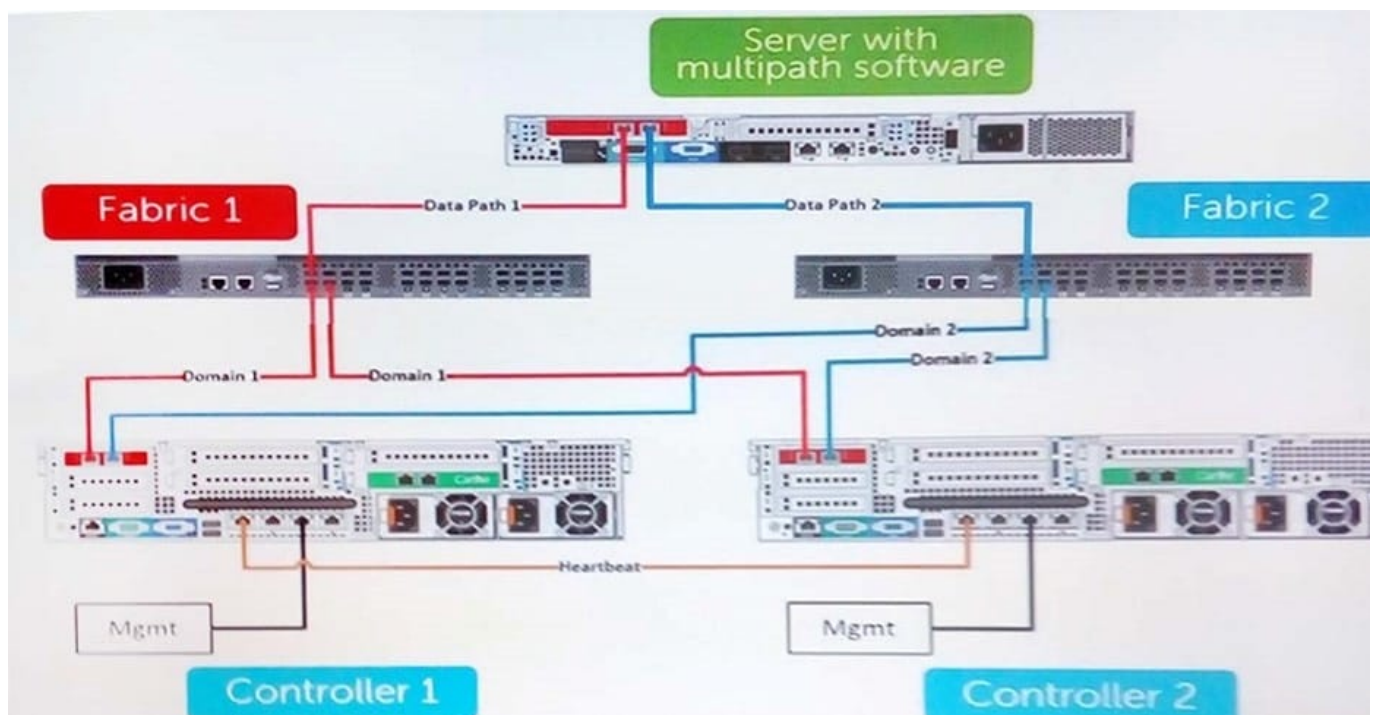

You are deploying a new SCv2020 system with four additional SCv100 expansion enclosures. What is the spare-to-managed drive ratio?

- A. 1 spare for every drive of that type per enclosure
- B. 1 spare for every 24 managed drives of that drive type
- C. 1 spare per enclosure regardless of the drive type
- D. 1 spare for every 20 managed drives of that drive type

Correct Answer: D

### QUESTION 2

Based on the exhibit, a customer is using a Virtual Port Mode configuration. If the cable for Domain 1 on Controller 1 is disconnected during failover testing, will the SC Series array port failover work?

- A. No, the configuration contains only a single port per domain and will not provide port failover.
- B. Yes, the configuration will provide port failover as the system is configured for Virtual Port Mode.
- C. No, port failover only works in Legacy Port Mode.
- D. Yes, the configuration will provide port failover regardless of domains or mode.

Correct Answer: B

### QUESTION 3

While installing a SC system the customer reports that it will house a database that has a nightly database backup that starts at 6 pm. What system configuration change can you make to lessen the impact of this SQL job?

- A. Set the volume for Snapshot on RAID 6
- B. Change Data Progression start time
- C. Set the volume to have a Snapshot taken at 6 pm
- D. Set Data Progression to run for 1 hour

Correct Answer: B

---

### QUESTION 4

In an SC Series environment, which Fibre Channel zoning method is more flexible?

- A. Port
- B. Single Initiator/Multi-Target
- C. Single Initiator/Single Target
- D. WWN

Correct Answer: D

---

### QUESTION 5

Which option will enable compression on an SC Series array volume?

- A. Compression Profile
- B. Default Compression
- C. Data Reduction Profile
- D. Enable Compression

Correct Answer: C
