-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

#### QUESTION 1

You are creating a cloud infrastructure design for an organization. You learn that, for compliance reasons, the organization needs to maintain a separate set of infrastructures for certain deployed services. Which part of the design will be impacted by this requirement?

- A. Number of compute pools
- B. Number of service catalogs
- C. Over-commitment ratio
- D. Service catalog sizing

Correct Answer: B

---

#### QUESTION 2

An organization is considering the use of a cloud gateway to back up services in their private cloud environment. They want to use their existing backup application. What should they ensure about the cloud gateway appliance?

- A. Supported by the backup application Supports the target object storage APIs
- B. Supported by the hypervisor Supports the target object storage APIs
- C. Supported by the backup application Supports the target SMB storage APIs
- D. Supported by the hypervisor Supports the target SMB storage APIs

Correct Answer: A

---

#### QUESTION 3

You are designing a cloud to support an Oracle OLTP environment. What is the recommended read/write ratio to use in this environment?

- A. 2 to 1
- B. 3 to 1
- C. 4 to 1
- D. 5 to 1

Correct Answer: D

---

#### QUESTION 4

An organization wants to have showback capability in their private cloud. Which cloud management platform component

should be included in the cloud design to support this requirement?

- A. SSO
- B. Service catalog
- C. Metering application
- D. Monitoring application

Correct Answer: C

Note: IT chargeback is an accounting strategy that applies the costs of IT hardware, software, cloud services or shared services to the business unit in which they are used. IT showback is similar to IT chargeback, but the prices are for informational purposes only and no one is billed.

## QUESTION 5

### SPECIAL INSTRUCTIONS REMINDER

The remaining questions are associated with two cases. Each case has an introductory, descriptive passage (case text) that describes background information and requirements for a specific cloud based design. And each case has a set of six related, randomized questions. You will need to read the case text in order to answer the related questions correctly.

Given that there are two cases with six scored questions each, the total number of case-based scored questions is 12.

When you display each questions you can easily review the related case text in a pop-up window by clicking on the "Case" icon (shown below)

Case 4

Refer to the exhibit.

Your company is currently using a traditional SAN storage network. The server infrastructure is partially virtualized. There is a public cloud in place that is used to test development and application migration to cloud.

Business requirements:

Consolidate the network, storage, and compute resources Simplify network management and storage provisioning Maintain application performance

Need to share resources to reduce cost and improve efficiency Other considerations:

Monitoring of protection SLAs

All transactions must be logged for auditing review

Users are validated using internal credentials

Refer to Case 4.

You are designing the network components for a Do-It-Yourself private cloud solution. You want to restrict domain events and minimize traffic disruptions between nodes.

Which compute to storage connectivity solution provides this function?

- A. VSAN
- B. FC SAN
- C. VLAN
- D. VXLAN

Correct Answer: D
