QUESTION 4

A customer wants to perform a data center refresh. They want to standardize their backup infrastructure by using Dell EMC NetWorker and Data Domain in an integrated environment. The environment consists of:

A primary data center with NetWorker and Data Domain A disaster recovery (DR) data center with only Data Domain

All data is backed up to NetWorker using a DD Boost device. The data is then copied to the DR data center. Data for several critical systems needs to be retained for seven years on tape at the DR data center. In order to configure and track backup jobs, the entire solution must be managed from a single unified interface.

Which application interface should be used?

- A. NetWorker Management Console
- B. Data Domain Management Center
- C. Data Protection Advisor
- D. Backup and Recovery Manager

Correct Answer: A

QUESTION 5

A customer is evaluating the risks associated with their environment after implementing a Dell EMC Isolated Recovery Solution.

What is the probability of an air gap bypass?

- A. LOW
- B. MEDIUM
- C. HIGH
- D. INCREASING

Correct Answer: D
