QUESTION 1

A company's environment consists of two data centers with a single Dell EMC XtremIO array. The company has indicated that they need the ability to provide disaster recovery protection.

Which RecoverPoint license will provide this capability while minimizing cost?

- A. RecoverPoint/CL on both clusters
- B. RecoverPoint/CL on the Production cluster only
- C. RecoverPoint/SE on both clusters
- D. RecoverPoint/SE on the Production cluster only

Correct Answer: B

QUESTION 2

A customer has several branch offices with Dell EMC Data Domain integrated with Avamar deployed at all locations. The branch offices have minimal IT staff. The customer wants to keep a copy of the backups at their central data center which serves as their headquarters with a maximum IT staff. In addition, the customer wants to keep a copy in their public cloud account.

Which recommended solution meets the customer's requirements?

- A. Branch offices: Avamar/Data Domain replication to the central data center and Avamar tiering to the public cloud
Central data center: Avamar/Data Domain replication destination
- B. Branch offices: Data Domain MTree replication to the central data center
Central data center: Data Domain with Cloud Tier and Data Domain tiering to the public cloud
- C. Branch offices: Avamar/Data Domain replication to the central data center
Central data center: Avamar/Data Domain with Cloud Tier and Avamar tiering to the public cloud
- D. Branch offices: Data Domain MTree replication to the central data center and Data Domain tiering to the public cloud
Central data center: Data Domain MTree replication destination

Correct Answer: C

QUESTION 3

A customer is planning to implement a Dell EMC Integrated Data Protection Appliance (IDPA) solution. The customer needs 220 TB of usable capacity. Among other backup types, they want to use DDBEA/DD Boost on application hosts for direct backup ability for their DBAs. DD Boost backups may generate approximately 35 TB/hour at times.

Which IDPA model should be recommended?

- A. DP5300

- B. DP5800
- C. DP8300
- D. DP8800

Correct Answer: B

QUESTION 4

You are redesigning a customer's Dell EMC NetWorker backup solution. The customer has a Data Domain system at each location. The connection between the sites is 100 Mb. The customer wants to back up the data in their primary data center and then clone it to the other location.

What is the recommended way to replicate the data to the secondary site with different retention policies?

- A. Save Set Synchronization
- B. Save Set Staging
- C. Clone Controlled Replication
- D. MTree Replication with Retention Locking

Correct Answer: B
