### QUESTION 1

Universal Containers has proposed using a Developer Edition org to stage changes to their Customer Community, which includes multiple custom Visualforce pages and components. Which three risks should a Technical Architect consider in this strategy? Choose 3 answers

- A. Code changes cannot be deployed from a Developer Sandbox to Production.
- B. Developer Edition orgs have limited user counts and low data volume limits, which will make User Testing difficult.
- C. Developer Edition orgs cannot have sandboxes, which will make team development difficult.
- D. Developer Edition orgs do not run on production servers and will not perform well during testing.
- E. Changes Sets cannot be used to deploy from Developer Edition to Production which will make deployment more complex

Correct Answer: BCD

---

### QUESTION 2

Universal Containers has multiple project teams building into single org. The project teams are concerned with design conflicts and ensuring a common design process

What should an Architect recommend to prevent this conflict?

- A. Create a Center of Excellence Charter document.
- B. Create Design Standard for Governance.
- C. Create a backup system using GIT Repositories.
- D. Create a Release Management process.

Correct Answer: B

---

### QUESTION 3

Which two options should be considered when making production changes in a highly regulated and audited environment?

Choose 2 answers

- A. All changes including hotfixes should be reviewed against security principles.
- B. Any production change should have explicit stakeholder approval.
- C. No manual steps should be carried out.

D. After deployment, the development team should test and verify functionality in production.

Correct Answer: AB

#### QUESTION 4

Universal Containers (UC) is using custom metadata types to control the behavior of a few of the custom functionalities. UC wants to Deploy custom metadata types to production using Metadata API.

Which two data types does UC need to include?

Choose 2 answers

- A. CustomMetadataType
- B. CustomMetadata
- C. CustomObject
- D. Custom Field

Correct Answer: AD

#### QUESTION 5

A developer with Universal Containers recently created a flow in the developer sandbox. While working on the flow, the developer deactivated it and made updates multiple times before the flow worked as desired. Now the developer is planning to use a change set to migrate the flow to the QA sandbox.

What two statements should be considered when migrating the flow with change sets? Choose 2 answers

- A. When a change set with a multiple versioned flow is uploaded, it includes only the active version of the flow.
- B. When a change set with a multiple versioned flow is uploaded, it includes all the versions of the flow.
- C. When a change set with a multiple versioned flow is uploaded, and no active version is available, it includes the most recent inactive version of the flow.
- D. When a change set with a multiple versioned flow is uploaded, and no active version is available, it throws an exception.

Correct Answer: AC
