QUESTION 1

In the effort of improving the code quality, Universal Containers (UC) has asked a third-party system integrator toperform some independent code reviews. One piece of the feedback is the development team is seemingly not doing enough negative unit testing.

Which are three usual symptoms of inadequate negative tests

Choose 3 answers

A. Developers often have to turn to the debug log for details of the failed Apex executions.

B. When an Apex batch job runs at a scheduled time, an increased number of Apex execution errors occur over all.

C. An Apex process runs into an un-handled exception when an HTTP callout has an unexpected status code in the response body.

D. Developers constantly ask the testers for a screenshot of the error and the exact steps of reproducing the error.

E. The delivered user interfaces are regularly not meeting the expectations of the business users.

Correct Answer: ABC

QUESTION 2

Universal Containers has many backlog items and competing stakeholders who cannot agree on priority. What should an architect do to overcome this?

A. Facilitate the design of a prioritization model with the stakeholders.

B. Organize a sprint planning meeting with the Scrum team.

C. Take over prioritization for the stakeholders.

D. Allowthe delivery teams to pick the best work for the business.

Correct Answer: A

QUESTION 3

A Salesforce contractor has built an application for Universal Containers (UC) .The contractor will need to deploy multiple times from the contractor\'s own Salesforce to UC\'s Salesforce environments. Ultimately, UC has full control of theapplication\'s code, including its intellectual property

A. Eclipse IDE

B. Unmanaged Package

C. Change Sets.

D. Managed Package

3 / 4

Correct Answer: B

QUESTION 4

Universal Containers\'s architect is documenting the application lifecycle management (ALM) process to communicate it to the development teams from different implementation partners.

Which three steps apply to any Salesforce development project?

Choose 3 answers

A. Continuous Integration

B. Develop

C. Build Release

D. Test

E. Change Sets

Correct Answer: ACD

QUESTION 5

The CEO at Universal Containers (UC) is receiving constant complaintsfrom business stakeholders that the development teams are not frequently delivering value to the end- user. The CEO talked with the CTO, who argues the opposite, explaining that the development teams are delivering value every Sprint.

The architect suggests to the CTO to implement Kanban to solve this disagreement.

How can Kanban help clarify whether value is being delivered to the business?

A. Kanban teams respond to unplanned work and changes by dropping everything and jumping on the new request, ensuringagility.

B. Kannan traits includes metrics, like lead time and throughput, which increases transparency.

C. Kanban can make use of the Salesforce Agile Accelerator to speed up delivery.

D. Kanban limits work in progress, so the executives will know the development team is not overworked.

Correct Answer: B
