QUESTION 1

An organization performs a full back up every Sunday and incremental back ups on the remaining days at 9:00 AM. However, at 10 PM on Friday, a data corruption occurs that requires a data restoration from the backup copies.

How many backup copies are required to perform this restoration?

- A. 2
- B. 4
- C. 5
- D. 6

Correct Answer: D

QUESTION 2

Which feature of an object-based storage system abstracts and provides a common view of storage independent of location to applications?

- A. Global namespace
- B. Flexible data access
- C. Multi-tenancy
- D. Scale-out architecture

Correct Answer: A

QUESTION 3

A start-up company with a limited budget is planning to adopt a hybrid cloud solution for their operations. The company has business-critical applications that serve customers and have strict service levels. In addition, the company has less critical applications such as backup and archive.

Which hybrid cloud strategy should be recommended to the company?

- A. Deploy the business-critical applications on an externally-hosted private cloud. Deploy the less critical applications on a public cloud.
- B. Deploy the business-critical applications on an on-premise private cloud. Deploy the less critical applications on an externally-hosted private cloud.
- C. Deploy the business-critical applications on an on-premise private cloud. Deploy the less critical applications on a public cloud.

D. Deploy the business-critical applications on an externally-hosted private cloud. Deploy the less critical applications on an on-premise private cloud.

Correct Answer: A

QUESTION 4

What is an accurate statement about VSAN trunking?

- A. Allows network traffic from multiple VSANs to traverse a single interswitch link
- B. Enables an F_Port to transfer multiple VSAN traffic over a single port channel
- C. Provides VSANIDs to F_Ports to include them in the VSANs
- D. Forwards FC frames between F_Ports that belong to the same VSAN

Correct Answer: A

QUESTION 5

What is an accurate statement about a denial-of-service attack?

- A. Prevents legitimate users from accessing resources or services
- B. Intentional misuse of privileges to compromise data security
- C. Gaining unauthorized access to a user's accounts and data
