QUESTION 1

An organization has a private cloud infrastructure. They want to leverage the capabilities of a public cloud by using the hybrid cloud model.

Which virtual private network (VPN) connection method will enable them to establish a secure connection to the public cloud?

- A. Site-to-site VPN connection
- B. Remote access VPN connection
- C. User access VPN connection
- D. Global access VPN connection

Correct Answer: A

QUESTION 2

An organization plans to deploy a community cloud on their premises. Computer systems of the other organizations in the community must have LAN connectivity with those in the cloud infrastructure.

Which network virtualization technique do they require?

- A. Virtual Extensible LAN
- B. Private Virtual LAN
- C. Community Virtual LAN
- D. Isolated Virtual LAN

Correct Answer: A

QUESTION 3

What is an OpenID mechanism?

- A. An open standard for authentication in which a service provider uses authentication services from an identity provider
- B. An open authorization mechanism that allows a client to access protected resources from a resource server on behalf of a resource owner
- C. A network authentication protocol that provides strong authentication for client/server applications by using secret-key cryptography
- D. A mechanism that examines data packets traversing a network and compares them to a set of filtering rules

Correct Answer: A

QUESTION 4

What is a function of financial management?

- A. Provide necessary business cases for investment
- B. Evaluate quality and cost of supplied products against the SLA
- C. Procure capacity in the most cost-effective manner
- D. Meet availability needs with a justifiable return on investment

Correct Answer: A

QUESTION 5

What is the effect of network broadcast traffic reaching the configured network storm control threshold on a switch port?

- A. Broadcast traffic is blocked. Subsequent broadcast frames are dropped for a specific interval.
- B. Broadcast traffic is allowed partially, maintaining the traffic rate below the threshold level.
- C. Switch port bandwidth increases automatically to accommodate the traffic.
- D. The switch port is disabled. Administrator intervention is required to enable it.

Correct Answer: A
