QUESTION 1

An organization wants to include performance monitoring in their cloud environment. However, they want to minimize the number of accounts and passwords that must be created on target devices and sent across the network.

Which monitoring solution should a cloud architect recommend to meet this requirement?

- A. Proxy
- B. Agent-based
- C. Agentless
- D. Central

Correct Answer: D

QUESTION 2

In addition to the operating system, what other components does the consumer manage in an IaaS cloud service model?

- A. Application, data, storage, and physical networking
- B. Data, middleware, application, and runtime
- C. Runtime, physical servers, application, and middleware
- D. Middleware, runtime, hypervisor, and application

Correct Answer: B

QUESTION 3

Which set of general criteria should the cloud architect consider when selecting a cloud management platform?

- A. Multi-tenancy, API version, and cross-platform awareness
- B. Hypervisor, hybrid cloud capabilities, and authentication
- C. Geographic region, networked storage, and Internet access
- D. Network storage, operating system drivers, and update services

Correct Answer: B

QUESTION 4

You are creating a cloud infrastructure design for an organization. You learn that, for compliance reasons, the

organization needs to maintain a separate set of infrastructures for certain deployed services. Which part of the design will be impacted by this requirement?

- A. Number of service catalogs
- B. Number of compute pools
- C. Service catalog sizing
- D. Over-commitment ratio

Correct Answer: B

QUESTION 5

An organization wants to deploy a block storage in the cloud using a storage array that is accessible through the iSCSI protocol. The hosts support iSCSI.

Why would network segmentation be included in the design to support this requirement?

- A. Secure all traffic between the storage array and the hosts
- B. Enable CHAP between the array and hosts
- C. iSCSI traffic is not supported on networks with other types of traffic
- D. Enable LUN masking capabilities of the array

Correct Answer: D
