QUESTION 1

Which library is NOT part of the Apache Spark distribution?

- A. MLib
- B. NLTK
- C. GraphX
- D. Spark SQL

Correct Answer: B

QUESTION 2

Which scenario is a proper use case for multinomial logistic regression?

- A. A marketing firm wants to estimate the personal income of a group of potential customers. Using inputs such as age, education, marital status, and credit card expenditures, a data scientist is building a model that will estimate a person's income
- B. A logistic distribution company wants to minimize the distance traveled by its delivery trucks. A data scientist is building a model to determine the optimal route for each of its trucks
- C. To improve the initial routing of a loan application, a financial institution plans to classify a loan application as Approve, Reject, or Possibly_Approve. Based on the company's historical loan application data, a data scientist is building a model to assign one of these three outcomes to each submitted application.
- D. A manufacturer plans to determine the optimal number of workers to employ in an assembly line process. Utilizing the observed distributions of the task durations of each process step, a data scientist is building a model to mimic the interactions and dependencies between each stage in the manufacturing process.

Correct Answer: C

QUESTION 3

What do first-order and second-order Markov processes have in common concerning next word prediction?

- A. Both use WordNet to model the probability of the next word
- B. Both are unsupervised methods
- C. Both provide the foundation to build a trigram language model
- D. Neither makes assumptions about the probability of the next word

Correct Answer: C

QUESTION 4

What is an ideal use case for HDFS?

- A. Storing files that are updated frequently
- B. Storing files that are written once and read many times
- C. Storing results between Map steps and Reduce steps
- D. Storing application files in memory

Correct Answer: B

QUESTION 5

Why would a company decide to use HBase to replace an existing relational database?

- A. It is required for performing ad-hoc queries.
- B. Varying formats of input data requires columns to be added in real time.
- C. The company's employees are already fluent in SQL.
- D. Existing SQL code will run unchanged on HBase.

Correct Answer: A
