QUESTION 1

Which representation is most suitable for a small and highly connected network?

- A. Edge list
- B. Adjacency matrix
- C. Eigenvector centrality
- D. Adjacency list

Correct Answer: B

QUESTION 2

What do lemmatization and stemming have in common?

- A. Use WordNet
- B. Remove common words in a natural language
- C. Reduce the high dimensionality in text
- D. Use a set of heuristics

Correct Answer: C

QUESTION 3

Which scenario is a proper use case for multinomial logistic regression?

A. A marketing firm wants to estimate the personal income of a group of potential customers. Using inputs such as age, education, marital status, and credit card expenditures, a data scientist is building a model that will estimate a person\\'s income

B. A logistic distribution company wants to minimize the distance traveled by its delivery trucks. A data scientist is building a model to determine the optimal route for each of tis trucks

C. To improve the initial routing of a loan application, a financial institution plans to classify a loan application as Approve, Reject, or Possibly_Approve. Based on the company\\'s historical loan application data, a data scientist is building a model to assign one of these three outcomes to each submitted application.

D. A manufacturer plans to determine the optimal number of workers to employ in an assembly line process. Utilizing the observed distributions of the task durations of each process step, a data scientist is building a model to mimic the interactions and dependencies between each stage in the manufacturing process.

Correct Answer: C

QUESTION 4

After a client submits a job request to the YARN ResourceManager, what happens next?

- A. The scheduler allocates a container to run an ApplicationMaster
- B. The ResourceManager allocates containers to run map and reduce tasks
- C. The Resource Manager requests load data from the NodeManagers
- D. The ApplicationManager starts an ApplicationMaster

Correct Answer: D

QUESTION 5

Which HDFS feature protects against user errors causing accidental loss of data?

- A. Encryption
- **B.** Replication
- C. Namenode federation
- D. Snapshots
- Correct Answer: B
