**QUESTION 1**

You are designing an SRDF/S over Fibre Channel solution. Data centers are 100 km apart and 4 Gb/s FC links are in place. What is the minimum number of buffer-to-buffer credits required to maximize the utilization of the links?

- A. 25
- B. 50
- C. 100
- D. 200

Correct Answer: D

QUESTION 2

Which SRDF remote replication licenses are available with VMAX3?

- A. Remote Replication Suite and SRDF Registered
- B. Remote Protection Suite and Application Protection Suite
- C. Remote Replication Suite and SRDF/Automated Replication
- D. Remote Protection Suite and SRDF Registered

Correct Answer: A

QUESTION 3

How do Service Level Objectives (SLO) capacity compliance algorithms differ from Storage Resource Pools (SRP) capacity compliance algorithms?

- A. SLO capacity compliance ensures data is placed on the correct drive types. SRP capacity compliance ensures data is placed on the correct SRP.
- B. SLO capacity compliance ensures data is placed on the correct SRP. SRP capacity compliance ensures data is placed on the correct drive types.
- C. SLO capacity compliance ensures response time objectives are maintained. SRP capacity compliance ensures performance metrics determine data placement.
- D. SLO capacity compliance ensures performance metrics determine data placement. SRP capacity compliance ensures response time objectives are maintained.

Correct Answer: A

QUESTION 4

You are designing an SRDF/S over Fibre Channel solution. Data centers are 50 km apart and 4 Gb/s FC links are in place. What is the minimum number of buffer-to-buffer credits required to maximize the utilization of the links?

- A. 25
- B. 50
- C. 100
- D. 300

Correct Answer: C

QUESTION 5

When is the Suitability Check run on a VMAX3?

- A. While provisioning new storage
- B. Before a code upgrade
- C. When selecting a Port Group
- D. After storage has been allocated

Correct Answer: A
