## QUESTION 1

### DRAG DROP

After a logical corruption, data on a production volume is inaccessible. As the volume is replicated using RecoverPoint, the administrator decides to use the “Test a Copy and Recover Production” wizard to restore this volume to its state prior

to the logical corruption.

What is the correct sequence of steps to complete the recovery activity?

Select and Place:

Actions	Answer Area
Unmount the production volume as the Recovery wizard will overwrite it with the recovery data	STEP 1
Select a snapshot prior to the corruption	STEP 2
After the recovery is complete, remount the volume to the production host	STEP 3
Mount the snapshot to a verification host and verify its integrity	STEP 4
Monitor the progress of recovery from the Unisphere “Manage Recovery” wizard	STEP 5

Correct Answer:

**Actions**

**Answer Area**

Select a snapshot prior to the corruption

Mount the snapshot to a verification host and verify its integrity

Unmount the production volume as the Recovery wizard will overwrite it with the recovery data

Monitor the progress of recovery from the Unisphere "Manage Recovery" wizard

After the recovery is complete, remount the volume to the production host
