QUESTION 5

A storage administrator is creating a Consistency Group using Unisphere on RecoverPoint/EX. After defining the production volume and Journal, the next step is to select the copy volume. Based on the exhibit, what determines the volume size displayed by the wizard as a choice of copy volumes?

- A. Volumes that are created on the selected array and masked to the backup host
- B. Volumes that are the same size and attached to the selected write splitter
- C. Volumes that are masked to the selected cluster and the same size or larger than production
- D. Any volume that is provisioned to the selected cluster from the same array type as production

Correct Answer: D
