QUESTION 1

Your company requires a service funding model that will allow it to make short term spending decisions as part of an incremental strategic spending program. Which funding model should you recommend?

- A. Central
- B. Usage
- C. Project
- D. Hybrid

Correct Answer: C

QUESTION 2

You are architecting a new cloud application for your company. You have been tasked to determine the impact of the company's required governance directives across the full lifecycle. What governance element should you apply during the build of the service?

- A. Using approved development methods and policies
- B. Following all requirements for putting together a service proposal
- C. Determining how customer satisfaction will be measured
- D. Utilizing existing IT capabilities if policies allow

Correct Answer: D

QUESTION 3

An organization has been providing web services within their private cloud. The web services, deployed through a service catalog, depend on a database resource in the private cloud.

The organization decided to make these web services availability globally by using a public cloud provider. However, once one of the web services were deployed into the public cloud, users started complaining about poor performance.

Which solution would most likely improve performance of the web services.

- A. Balance the load globally across multiple instances of the database
- B. Re-architect the web-service to be deployed as a micro service
- C. Re-architect the web-service to be loosely coupled with the database
- D. Balance the load globally across multiple instances of the web service.

Correct Answer: D

QUESTION 4

A service provider is starting a new business for providing cloud services. However, they are concerned that their cloud infrastructure design needs to be validated by usage over time and then adjusted to handle heavy loads.

What can they do to mitigate this concern with paying customers?

- A. Not accept any heavy loads until the design has been validated
- B. Re-design their cloud infrastructure to accommodate heavy loads
- C. Design their costing model to include loss of unhappy customers
- D. Include a reimbursement policy for service outages in the SLA

Correct Answer: A

QUESTION 5

You have been asked by a recently formed DevOps team to qualify the principles for Continuous Delivery. Which method falls outside the practice of continuous delivery?

- A. Use component-based architecture
- B. Tie code releases to operational constraints
- C. Automate the delivery pipeline
- D. Deploy smaller code segments more often

Correct Answer: B
