QUESTION 1

An organization runs as Internet-based software service. To remain competitive with newcomers to the same market, the organization is transitioning from their traditional annual software release model on a monolithic stack to a quarterly minimum release model using cloud.

To achieve this goal, in what technologies should the organization invest?

- A. Stackless operations, DevOps, and continuous delivery
- B. Continuous delivery, cloud-native application design, and stackless operations
- C. DevOps, continuous delivery, and cloud-native application design
- D. Cloud-native application design, stackless operations, and DevOps

Correct Answer: C

QUESTION 2

A large IT organization has committed to transition to ITaaS. What changes would need to happen in the IT organization to adopt this model?

- A. IT organization would move from a strategic business partner to a cost center view
- B. All the products and services would be delivered by the lines of business (LOBs)
- C. New service related roles and responsibilities would emerge to support the model
- D. Business users would acquire services that meet their needs quickly only through IT

Correct Answer: C

QUESTION 3

An organization falls under the compliance regulations for PCI. The organization will deploy applications in the public cloud and wants to use a public cloud provider that is PCI compliant.

How does the organization confirm compliance?

- A. Provide third party audit documentation to the provider for review
- B. Review the provider's compliance controls and third party audit documentation
- C. Review the provider's infrastructure logs and access logs
- D. Provide application logs to the provider for review

Correct Answer: C

**QUESTION 4**

An organization is using a hybrid cloud for services. They wish to mitigate the risk of compromising data confidentiality. How can this be accomplished?

- A. Include digital signature capabilities in services
- B. Establish a parent-child relationship of data records
- C. Include an option in the catalog for service placement
- D. Include a data-at-rest encryption capability in services

Correct Answer: D

QUESTION 5

An IT organization is transitioning to cloud services to support an ITaaS model. The CIO has informed their directors that IT must be managed like a business. What must IT do to meet this strategic goal?

- A. Complete with the lines of business for company profits
- B. Complete with offerings from cloud providers
- C. Contribute to the company by becoming a cost center
- D. Become the single source for cloud services

Correct Answer: B
