Following Questions and Answers are all new published by SAP Official Exam Center

QUESTION 1

You follow the Code-to-Data paradigm in your ABAP coding.

Which of the following scenarios conflicts with the SQL performance guideline "Keep unnecessary load away from the database"?

A. Perform business logic and aggregations on database table content, then transfer the results to the application layer.

B. Perform join operations on database tables, then transfer the results to the application layer.

C. Perform calculations on data transferred to the database layer, then transfer the results back to the application layer.

D. Perform text search operations on database table content, then transfer the results to the application layer.

Correct Answer: C

QUESTION 2

How many result sets are returned when an SAP HANA database procedure is called using the CALL WITH OVERVIEW statement?

Please choose the correct answer.

A. As many result sets as there are input parameters in the procedure

B. Two result sets

C. One result set

D. As many result sets as there are table output parameters in the procedure

Correct Answer: C

QUESTION 3

What views will be most efficient for General Modeling Principles? There are 2 correct answers to this question

A. Attribute view

B. Schema view

C. Column view

D. Analytical view

Correct Answer: AD

QUESTION 4

You analyse SQL Monitor data in transaction SQLMD. You know that program X accesses database table Y. You made sure that program X was executed while the SQL Monitor collected its data. But the relevant database access is NOT listed in SQLMD.

What could be the reason?

Note: There are 3 correct answers to this question.

A. SQL Monitor was activated for a specific application server

B. SQL monitor was activated with a filter that excludes database table Y

C. The data has NOT yet been transferred to the SQL monitor database tables

D. Program X was executed in the background.

E. Database table Y is a buffered table.

Correct Answer: ABC

QUESTION 5
