QUESTION 1

What requirements are good candidates for reuse?

- A. Requirements without direct ties to a particular tool
- B. Requirements expressed in more detail
- C. Requirements at low levels of abstraction
- D. Requirements with specific references to departments

Correct Answer: A

Requirements that are represented in a general manner, without direct ties to a particular tool or organizational structure, tend to be more reusable.

QUESTION 2

When determining the potential value of a solution, a business analyst (BA) should consider it from the point of view of the:

- A. development team.
- B. testing team.
- C. customer.
- D. business analyst.

Correct Answer: C

QUESTION 3

Which type of requirements are temporary in nature?

- A. Business requirements
- B. Solution requirements
- C. Stakeholder requirements
- D. Transition requirements

Correct Answer: D

A requirement that describes the capabilities the solution must have and the conditions the solution must meet to facilitate transition from the current state to the future state, but which are not needed once the change is complete. They are differentiated from other requirements types because they are of a temporary nature.

QUESTION 4

The purpose of using process analysis is to:

- A. identify and evaluate the underlying causes of a problem.
- B. improve decision making by finding useful patterns.
- C. understand factors to be included in a contract negotiation.
- D. describe the sequential flow of work or activities.

Correct Answer: C

Process analysis is used for various purposes including:

1.
recommending a more efficient or effective process,
 2.
determining the gaps between the current and future state of a process,
 3.
understanding factors to be included in a contract negotiation,
 4.
understanding how data and technology are used in a process, and
 5.
analyzing the impact of a pending change to a process.
-

QUESTION 5

Which approach aligns to approval of requirements at the end of a phase?

- A. Adaptive
- B. Modelling
- C. Predictive
- D. Prioritization

Correct Answer: C

Approval of requirements and designs may be formal or informal. Predictive approaches typically perform approvals at the end of the phase or during planned change control meetings.
