QUESTION 1

Max story creations per org per day:

- A. 40 per org
- B. 40 per org per clay
- C. 20 per org
- D. 100 per org per clay

Correct Answer: D

QUESTION 2

An Einstein Analytics team created a funnel chart to show the number of opportunities in each stage. The managers who use the chart report that the funnel shows stages in alphabetical order instead of sales cycle order.

In which two ways can a consultant help them address this issue? Choose 2 answers

- A. Use a dataflow to rename the stages with a preceding number.
- B. Use a dashboard JSON to rename stages.
- C. Use a dataflow to sort the stages by their internal name.
- D. Use a dataset XMD to rename stages.

Correct Answer: AD

QUESTION 3

A consultant is asked to create a dashboard for sales to see the forecasted sales per product family. After gathering the requirements, the consultant decides to leverage the timeseries SAQL statement to predict sales.

Which two actions must be performed when writing the SAQL query?

Choose 2 answers

- A. Determine if the timeseries required parameter, prediction interval, should be 80 or 95.
- B. Investigate which prediction model is best for the data available.
- C. Validate that there is enough data in the dataset to make a good prediction.
- D. Include the fill SAQL statement to fill any missing dates.

Correct Answer: BD

QUESTION 4

What's the best way to describe the template-info.json file?

- A. It's a read-only file with all the user documentation for a template.
- B. It's the boss of the template with all the information needed to create the app.
- C. It makes sure that the app includes all the right Salesforce data.
- D. It's automatically populated every time you create an app from the template.

Correct Answer: B

QUESTION 5

In Einstein Discovery:

A. "What Is The Difference" insights are comparative insights that help you better understand the relationships between explanatory variables and the goal (target outcome variable) in your story. These insights, based on a statistical analysis of your dataset, help you figure out which factors contribute to the biggest changes in the outcome variable. Einstein Discovery uses waterfall charts to help you visualize comparisons in What Is The Difference insights.

B. "Why It Happened" insights help you take a deeper look into the exact factors that led to an outcome. Why It Happened s/ Q insights drill deeper into the various factors that contributed to your story's goal. These insights are based on a statistical analysis of your dataset. Einstein Discovery uses waterfall charts to help you visualize Why It Happened insights.

C. "Predictions and Improvements" insights help you explore what might happen in the future. For example, you can interactively perform "what if analyses in your story. Einstein Discovery provides you with predictions and suggested improvements based on a statistical analysis of your dataset and predictive analytics. To help you visualize these insights, Einstein Discovery uses:

D. - waterfall charts for predictions

-bar charts for suggested improvements

E. "What Happened" insights are the primary insights in your story. They are descriptive insights that help you explore, at an y/ Q overview level, what factors contributed to the outcome, based on a statistical analysis of your dataset. Einstein Discovery uses bar charts to help you visualize What Happened insights.

Correct Answer: ACD
